SUMMARY

Cybersecurity-focused Computer Science undergraduate with internship experience in OSINT, VAPT, and threat analysis. Skilled in identifying vulnerabilities, assessing security risks, and supporting remediation efforts. Developed security and AI-driven projects, including a phishing-detection system, with emphasis on secure design and reliability. Eager to apply foundational cybersecurity skills and grow within a dynamic security team.

INTERNSHIPS

X-Biz Techventures Private Limited

Cybersecurity Analyst Intern | Pune, Maharashtra | Jan – May 2026

- Conducted **OSINT-driven threat analysis** across 15+ domains, uncovering 40,000+ exposed sensitive files, 100+ IOCs, and critical misconfigurations; mapped to **OWASP Top10 and CWE Frameworks**
- Performed **web application VAPT using Burp Suite and OSINT concepts**, identifying 15+ vulnerabilities (**SQLi, XSS, broken authentication**) with risk-scored remediation reports
- Attempted an **SSL Pinning Bypass attack** on a mobile application to find critical vulnerabilities

Tinnovat Science and Technology Consultancy

Technical Trainee | Sharjah, United Arab Emirates | May – July 2024

- Developed a full-stack web application using **10+ React.js components** and **Django REST with JWT authentication and secure API design**

PERSONAL PROJECT

GoPhish – an ML integrated Phishing Detection System

Personal Project | April 2026

- Built a phishing detector using Python and Gemini 2.5 Flash Lite API to check email URLs and messages for phishing attacks
- Created a Levenshtein Distance based typosquatting detector and used Regular Expressions to detect hexadecimal/raw IP addresses, using a custom whitelist to eliminate false positives

COURSE PROJECTS

GeoStruct-X – an Agentic AI based system to check compliance of building plans

Capstone Project | VIT-AP University | August – December 2025

- Developed an agentic AI system to automatically evaluate building designs against regulatory and safety compliance rules.
- Designed rule-based and AI-driven validation workflows to identify non-compliance risks and generate structured outputs.
- Focused on reliability, explainability, and correctness in compliance decision-making.

DARPA – a Deep Learning based system to convert 2D medical scans into 3D reconstructions

Class Project – Deep Learning | VIT-AP University | January – May 2025

- Built a deep learning system to reconstruct 3D anatomical models from 2D medical scans

- Evaluated model performance with emphasis on data integrity, accuracy, and system reliability
- Gained experience working with sensitive data contexts and understanding the importance of robustness and accuracy in medical systems

CtrlWatt – an ESP32-based smart switch for industrial applications

Fifth Semester Project | VIT-AP University | January – May 2025

- Designed and implemented a smart switch system using ESP32, enabling remote and automated control of electrical devices using a custom Android application.
- Integrated hardware and firmware components with a focus on system reliability and secure control logic.
- Gained hands-on experience with embedded systems, IoT workflows, and device-level security considerations.

EXTRACURRICULARS

ACM Student Chapter VIT-AP University

Head of External Affairs – Jan 2024 – Apr 2025

- Managed industry relations, partnerships, and sponsorships, acting as the primary liaison between the ACM Student Chapter and external organizations.
- Strengthened the chapter's network by coordinating collaborations, guest sessions, and outreach initiatives.

Team Lead (Documentation) – Aug 2023 – Jan 2024

- Led the documentation team in creating, organizing, and maintaining high-quality reports, event records, and promotional content
- Ensured consistency, clarity, and timely delivery of all written and visual documentation for chapter activities.

Music Club Member; Pianist and Bassist for 'Not So Engineers'

CERTIFICATIONS

- **ISC2** Certified in Cybersecurity (CC) – In progress
- **PortSwigger** Web Security Academy – Labs in SQLi and XSS
- **AWS** Academy: Cloud Foundations and Cloud Architecture
- **OCI** Generative AI Professional
- **Massachusetts Institute of Technology** IDSS – Data Science and Machine Learning

EDUCATION

VIT-AP University | Amaravati, Andhra Pradesh | 2022-2026

Bachelor of Technology: Computer Science and Engineering | CGPA: 8.38

Chavara Public School, Pala | Kottayam, Kerala | 2022

Grade XII | 87.6%

Our Own English High School | Sharjah, United Arab Emirates | 2020

Grade X | 91%

SKILLS

- **SOC & SIEM:** Splunk (Basics), Alert Triage, Incident Investigation
- **VAPT:** Burp Suite, OWASP Top 10, Web Application Testing
- **Threat Intelligence:** OSINT, IOC Analysis, Phishing Detection
- **Technical:** Programming in Python, Java, Wireshark, TCP/IP, DNS, HTTP/S
- **Languages:** English, Malayalam, Tamil, Hindi, French
